\*KERAFOLE® test according to UL

These high elastic films are characterized by their excellent compressibility with moderate thermal and excellent dielectric behavior. Type 86/200 is constructed in two layers.

✓ Optional available with adhesive coating as **86/200K**

Data for engineer guidance only. Observed performance varies in application. Engineers are reminded to test the material in application.

At maximum pressure, SOFTTHERM® Films should not be compressed beyond 30% of the original thickness. In case the material should be compressed more than 30%, the SOFTTHERM® material may leak out.
